English	Full Prof.
Russian	Native

CAREER SUMMARY

PROFESSIONAL EXPERIENCE

DevOps Engineer | Elbit Systems

- Accompanying complex projects from initial development through automated testing and deployment stages as part of the core DevOps team.
- Building and optimizing automated CI/CD deployment pipelines for various organizational services using Jenkins and Azure DevOps.
- Designing and implementing automated processes end-to-end, utilizing Bash and Python scripts to run continuous integration workflows.
- Orchestrating containerized applications using Rancher (Kubernetes) to manage workload scheduling, networking, and scaling.
- Configuring and maintaining secure, high-availability host infrastructure across RedHat Enterprise Linux 9 and Windows environments.
- Managing software binary storage and release artifacts using JFrog Artifactory, configuring caching policies and pipelines.

DevOps Engineer | Firewave (Startup)

- Automated AWS cloud infrastructure provisioning using Terraform, shortening resource provisioning duration by 40%.
- Implemented robust GitHub Actions workflows to streamline microservice updates, enhancing deployment consistency and reliability.
- Deployed and scaled microservice applications in Amazon EKS and integrated serverless compute layers using AWS Lambda.
- Established a comprehensive observability and monitoring stack utilizing Prometheus and Grafana for real-time alerting.

PMO & Integration Specialist | Matrix, Herzliya

- Managed full-lifecycle integration and deployments of WMS enterprise systems, ensuring alignment with customer operational goals.
- Coordinated onsite system rollouts, including configuration management, custom scripting, and comprehensive customer training.
- Automated recurring operations and database actions using MSSQL queries, stored procedures, and custom script integrations.
- Developed custom client integrations using JavaScript and .NET (C#) while managing backend services hosted on IIS.

Project Manager | LogistiCare, Lod

- Directed delivery schedules, budgets, and milestones across multiple BI reporting and data visualization initiatives.
- Partnered with engineering and analytics teams to deploy frontend client dashboards, improving operations visibility.

Military Officer | IDF

Arming Officer & Safety Director (2004 – 2014)

Restaurant Manager | Trio Restaurant

Operations & Staff Coordination (2016 – 2019)
